Education

California Polytechnic State University, San Luis Obispo, BS in Computer Engineering Expected 2028

- CS+AI Project Team, Cal Poly Swim Club National Team Swimmer
- Coursework: Data Structures & Algorithms, Computer Architecture, Digital Design, Machine Learning, Embedded Systems, Operating Systems, Linear Algebra

Skills

Languages: Python, Java, C, JavaScript, SQL, RISC-V Assembly, SystemVerilog,

AI/ML: PyTorch, TensorFlow, scikit-learn, Google ADK, Vertex AI, Gemini API, HuggingFace, REST APIs, FastAPI, LLMs, RAG, NLP, deep learning, Cursor, Codex, Kiro

Cloud/DevOps: Google Cloud Platform (GCP), Cloud Run, Amazon Bedrock, Terraform, Docker, Supabase, Netlify, Merge Requests, Unit Tests, Code Reviews

Hardware: Basys3 FPGA, embedded C, microcontrollers, I2C/SPI, oscilloscopes, multimeters, logic analyzers, LTspice

Experience

AI/ML Engineering Intern, CloudWerx – Santa Clara, CA Summer 2026 (Incoming)

AI/ML Intern, CloudWerx – Santa Clara, CA Oct 2025 – Dec 2025

- Architected a multi-agent document intelligence system using Google ADK, Gemini 2.5 Flash, and Vertex AI, achieving 96% accuracy on DocVQA/InfographicVQA benchmarks via orchestrator–planner–executor design pattern
- Deployed hybrid OCR pipeline (Document AI + DeepSeek fallback) to Cloud Run via Terraform, processing 100+ document types at \$0.002/document with 100% pipeline success rate
- Designed REST API server exposing single-agent and multi-agent inference endpoints; benchmarked latency/cost tradeoffs (3.1s at \$0.01/query vs 5.9s at \$0.02/query)

Software/Sales Engineer Intern, Trussed AI – Palo Alto, CA June 2025 – Aug 2025

- Built and demoed AI-compliance SaaS integration prototypes for enterprise clients including top 5 US insurers, supporting technical sales cycles from scoping to deployment
- Scoped and documented software requirements across customer onboarding workflows; wrote internal technical documentation for API integration guides

Projects

Spontus (Co-Founder) May 2026 – present

Sponsorship Marketplace for College Club Sports | spontus.io

- Designed and shipped a live two-sided marketplace connecting college club teams with sponsors: team/sponsor onboarding, verified listings, and instant matching via a pre-built sponsorship "menu"
- Built deal-tracking (proof-of-post, photos, activations) and onboarded the first cohort of 6 Cal Poly club teams reaching 300+ athletes

ReBalance May 2026

Stroke Rehab Balance Board | Winner, oSTEM × CPES Hackathon, Cal Poly

- Built a pressure-sensitive balance board (Arduino UNO + 4 force-sensitive resistors) streaming real-time left/right weight distribution to a browser dashboard over the Web Serial API: ~\$74 in parts, no backend or cloud
- Developed a React/Vite/Tailwind dashboard with gamified therapy exercises, session tracking, and AI-generated clinical notes (Gemini 2.5 Flash) to make stroke rehab objective and measurable
